This document presents the marks awarded and related feedback for your submission for Coursework 1, Task 1. In the coursework specification the assessment criteria are stated as follows.

Assessment Criteria	Weighting %
Solution	50
Style/Good Practice	30
Code Comments	20
Total	100

Based on the above criteria the table below explains how each mark out of a possible 10 is awarded.

Assessment Criteria	Mark Available	Mark Awarded
Solution (one of the following applies to your code)		
Code has severely limited or no correct functionality, or there is no code	0	
Code achieves less than half of the requirements	1	
Code meets most but not all requirements	2	
Code meets the requirements but the input and/or output text is of limited value	3	
Code meets all the requirements and the input/output is appropriate	4	
Code exceeds the requirements with extra functionality	5	
Style / Good Practice (one mark for each of the following that applies)		
The code is readable and well-presented in terms of tabbing and spacing	1	
Appropriate choices have been made for variable names	1	
Ways in which the problem is solved are effective and efficient	1	
Code Comments (one of the following applies to your code)		
Comments are too brief to be useful, or there are no comments	0	
Comments are either unclear, do not accurately reflect the code, or are rather brief	1	
Comments are appropriate for the code	2	
Total	10	0
